Customer since

2018

Stockport Homes Group is an Arm's Length Management Organisation (ALMO) that took over the management of 11,500 Council homes in Stockport in 2005.

Stockport Homes is a multi award-winning not-for-profit organisation that delivers

excellent housing services to its customers.

They manage a total of 12,500 properties ranging from new builds, supported living schemes, sheltered accommodation schemes and 22 tower blocks.

Before Evotix

Stockport Homes initially relied exclusively on Excel spreadsheets and pen and paper systems to manage all health and safety processes.

This caused a frequent loss of information, complicated auditing and caused important hazards to go unnoticed.

The Challenge

With in-house construction, repairs and contractor divisions, the Group required a centralised system to oversee all divisions and sites. The Group realised they needed one place for all health and safety documentation, to help drastically streamline their processes.

Solution

The Perfect Home for Health and Safety

After purchasing the Risk and Audit Modules, The Stockport Homes Group immediately saw positive results.

With Evotix, the Group found exactly what they were looking for, a central hub for everything health and safety related.

Following these transformational results, the Group further expanded their Assure portfolio to include the Incident, People and Contractor solutions.

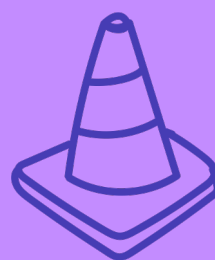

Outcomes

Achieving a Completely Paperless System

Working with Evotix, the Group has introduced a far more flexible and agile health and safety process. Employees can access Assure from any location, via a tablet, phone or computer.

Evotix has successfully centralised health and safety documentation and processes in one accessible place.

Now, the health and safety team completes audits and inspections on any team with full visibility of risk assessments.

Ensuring Complete Employee Competency:

01

The Group uses Assure to validate the competency of staff and contractors, from caretakers to electricians.

02

Assure holds contractor qualifications and certification information and set email reminders when any are due for renewal, supporting the Group in keeping their staff fully trained.

03

With Assure, the Group can easily demonstrate that their workforce holds relevant qualifications to legally and safely carry out work.

TRANSFORMING THE EVERYDAY WITH ASSURE

Then..

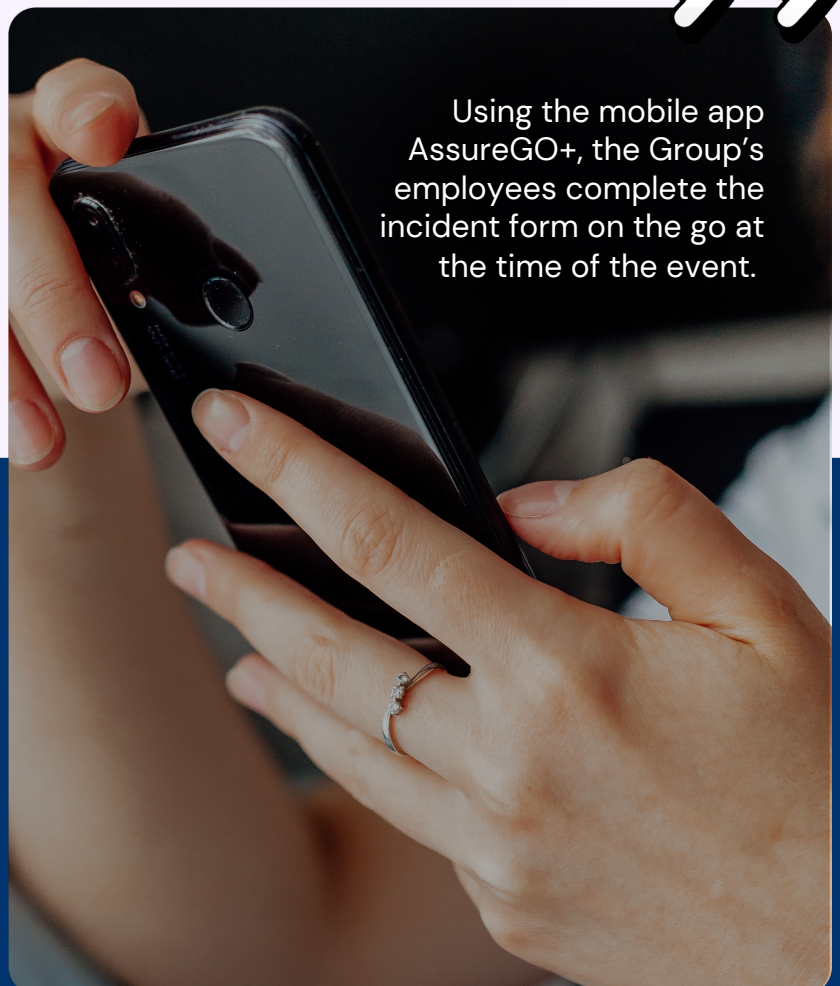

Prior to Assure, a staff member involved in an incident would have logged the event via a phone call or a Word Document. This posed a serious risk of loss of information.

Now..

Using the mobile app AssureGO+, the Group's employees complete the incident form on the go at the time of the event. This can be used for any incident, including verbal abuse incident reports.

THIS IS SOMETHING WE'VE NEVER BEEN ABLE TO DO BEFORE

Evotix has allowed us to really drill down into our accident data and body parts affected. This improves our awareness and safety intervention as a result.

Using the mobile app AssureGO+, the Group's employees complete the incident form on the go at the time of the event.

THE BIG WIN WITH THIS SYSTEM IS IT'S SO MUCH SIMPLER.
