ENVIRONMENT

Make health and safety part of everyone's role

With an increased focus on environmental legislation and regulation, organisations need to have clear visibility and confidence in their environmental performance.

Assure's Environment module allows you to easily record environmental activities across different areas of your organization, providing clear visibility of performance and trends.

An Aspects & Impacts register (which can be organizational wide or specific to business functions) provides an accurate view of Environmental hazards, impacts and controls.

A suite of assessments and waste register allows you to record, monitor and manage your environmental compliance including the use of any waste sub-contractors. Permits, waste records and policies can be attached to records.

Set up automated reviews to prompt reassessment where required. Full action management functionality monitors and tracks delegated environmental actions to completion.

Insights+, Assure's Business Intelligence tool, supports a proactive approach to environmental performance through the visualization of environmental metrics and trends.

Why Assure Environment?

- Provide central visibility of environmental performance across local teams/departments
- Reduce the risk of breaching regulations
- Promote delegation and local accountability
- Reduce the administrative burden of environmental reporting
- Help protect brand and reputation through positive environmental management

Features

- Monitor waste sources, volumes and movements
- Provide accurate information to support correct waste handling
- Approvals process helps ensure environmental activities are fit for purpose
- Action manager functionality tracks all delegated environmental actions through to completion
- Escalate overdue actions/reviews to line managers
- View performance and track KPI's/targets via interactive dashboards

What's included?

- **Aspects & Impacts Register** – Create a register of your organization's operations and environmental impact.
- **Aspects & Impacts Components**– Build a library of aspect and impact components to aid the creation of an Aspects & Impact register.
- **Land Contamination** – Record and report on sample results.
- **Aspects & Impacts Reporting** – Report specific units or measurements for specific impacts.
- **Environmental Assessment** – Create bespoke environmental audit template.
- **Air Emissions** – Record and report on sample results.
- **Waste Transfer** – Record the movement of waste from your sites.
- **Release to Water** – Record and report on sample results.
- **Waste Materials Register** – Log different types of waste being produced.
- **Waste Handlers Register** – Log the contractors who handle your waste.

Proactively Manage Safety with Assure

Assure comes with a suite of standard features that support effective health & safety management. Create a flow of information by capturing data on the mobile web app AssureGO+. This triggers notifications to prompt next steps and ensures that any required actions are closed out efficiently and effectively.

All activities can be visualized and analyzed in easy to use, configurable dashboards. This enables organizations to make the right strategic decisions to drive continuous improvement.
