5 Key Trends Impacting EHS Programmes in 2024

5 Key Trends Impacting EHS programmes in 2024

What are the emerging environment, health, and safety (EHS) trends?

Evotix, an SAI360 Company, brought together EHS experts from Enhesa, the British Safety Council and Verdantix to look into the crystal ball and share what they see for 2024.

\$322B

Annual Global Cost

employee turnover and lost productivity when low well-being is traced to burnout.*

Focus on Mental Health

In 2024, the worries are inflation, the cost of living and a potential recession.

Financial well-being is gaining traction with EHS professionals. When people fret over finances, they're not as focused on their work.

80%

of EHS professionals agree that ESG and sustainability is part of their responsibilities.**

A Balancing Act - EHS

Environmental, Social, Governance (ESG) focus will be on sustainability and emission disclosure requirements. That will drive demand for mandatory emission numbers, which often come from EHS practices. EHS practitioners ensure worker safety, creating a balancing act.

25%

Pledged Reduction

in risk and injuries (back, neck, shoulder) by 2025. Supported by Amazon. Led by the National Safety Council (US).

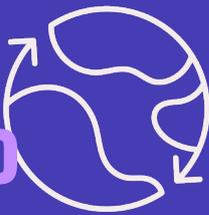

Regulations in the Spotlight

Most jurisdictions are not using guidance-based approaches; instead, they're placing obligations on employers regarding the health and safety of workers. For example, an EU directive encourages improvements. Member states have added the directive to their regulatory frameworks.

60%

odds of a Global Recession occurring

Global Economic Uncertainty

If there is one area of the company that can succeed in trying times, it's the EHS department. EHS ensures employees are engaged and productive.

The C-suite is also looking at the EHS function as never before. **CEOs and CFOs know EHS's value.**

Verdandix's

Top 10

List of EHS technologies to watch. 5 of the 10 related to emerging technologies that will further mature and be adopted in 2024.

Tech and Data Rule

Technology holds the promise of enabling better strategy and decision-making in 2024.

There is a big opportunity to increase efficiency by digitising processes. Trends and insights come from analysing lots of data, which makes EHS professionals better at their jobs.

If you need EHS technology solutions or metrics management for ESG reporting, **we can help.**
