employees**

Customer since

2021

W Silver Recycling is a long-established metal recycler operating across multiple sites in the United States and Mexico. Employees work in demanding industrial environments with heavy equipment and commercial vehicles, where safety and compliance rely on timely reporting and clear visibility.

By adopting Evotix, W Silver strengthened how safety, compliance and equipment information is captured and shared,

moving from manual processes to real-time, mobile-enabled reporting that supports safer operations and audit readiness across locations.

Challenges

W Silver Recycling operates in demanding industrial environments where employees work around heavy equipment, trailers and commercial vehicles. In this context, hazards, incidents and equipment issues can escalate quickly if they are not clearly identified and understood.

As operations expanded across sites in the U.S. and Mexico, safety and equipment information was captured through spreadsheets, emails and phone calls.

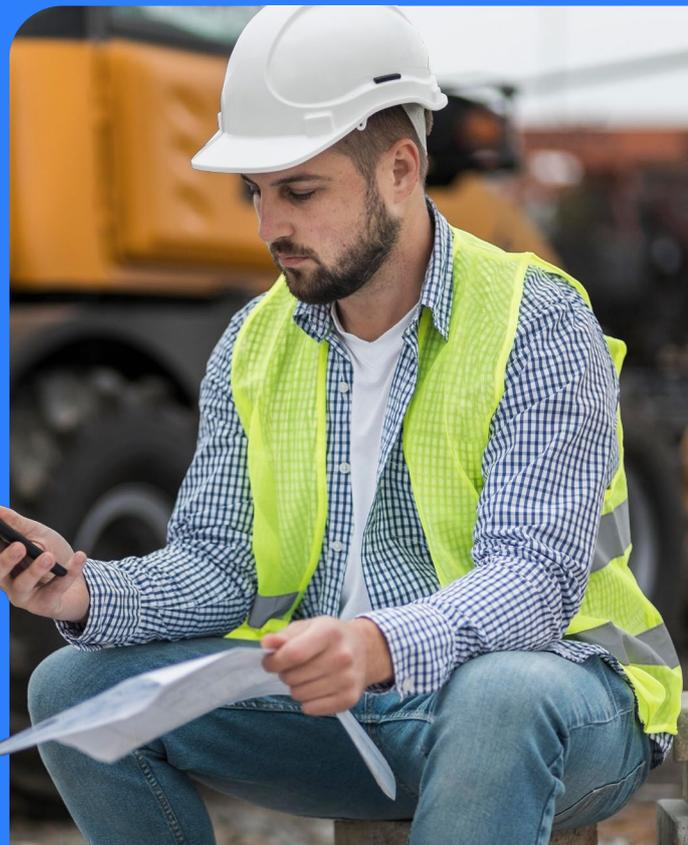

” Before Evotix, we relied on spreadsheets, phone calls and emails. We depended on managers to submit information, and it took time to pull everything together.

Victor Cruz
DOT Compliance Officer, W Silver Recycling

While this approach supported reporting at individual locations, it made it harder to gain consistent visibility across sites or understand conditions as they were occurring.

Information often had to be compiled after the fact, requiring additional effort to prepare audits, support compliance reporting and assess equipment readiness. Without direct visual documentation from the field, teams relied on follow-up and interpretation to understand issues and prioritize next steps.

Solution

Before Evtix

Safety, compliance and equipment reporting relied on manual, site-level processes. Information was captured through spreadsheets, emails and

phone calls, making it harder to consolidate insights and understand conditions across locations in real time.

After Evtix

A single digital system supports mobile reporting, photo documentation and centralized visibility across operations in the United States and Mexico.

Safety, compliance and equipment information is captured consistently and accessible across teams and locations.

” With Evtix the moment something is reported, we see it live.

Victor Cruz
DOT Compliance Officer, W Silver Recycling

The Outcome

With a single system supporting safety, compliance and equipment reporting, W Silver gained clearer insight into day-to-day conditions across its operations. Information that once required follow-up

and manual compilation is now captured consistently, helping teams respond faster, prepare for audits with confidence and make better-informed equipment decisions.

Centralized, real-time data

Live reporting improves awareness and response across safety, compliance and operations.

Faster compliance reporting

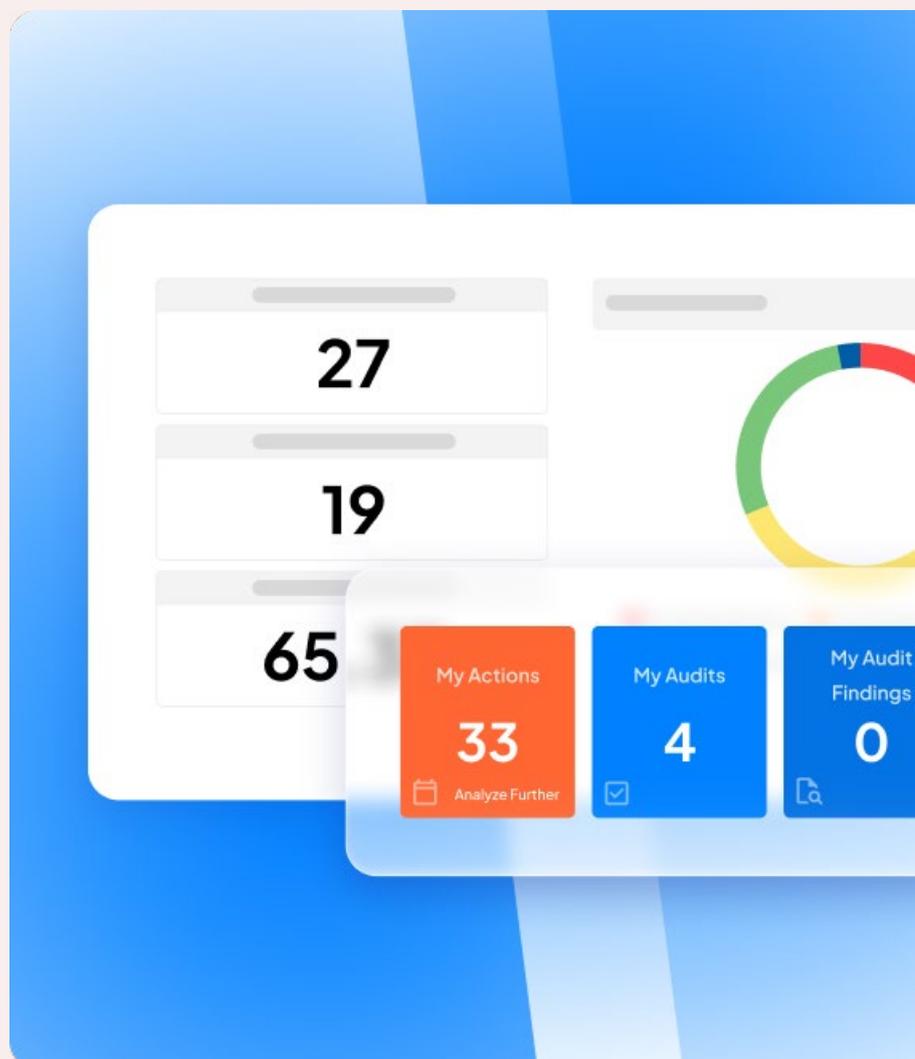

OSHA 300 and 300A logs can be generated from entered data, supporting audit readiness by site.

Improved equipment visibility

Photo-backed reports give teams a clearer view of trailer and equipment condition, helping assess whether assets are truly out of service or repairable.

Preventive maintenance enablement

Clear, consistent documentation supports earlier intervention, reduced downtime and better asset utilization.

Why Evotix?

Evotix combines mobile usability with centralized visibility, giving W Silver a practical way to modernize reporting while supporting safe, consistent operations across sites.

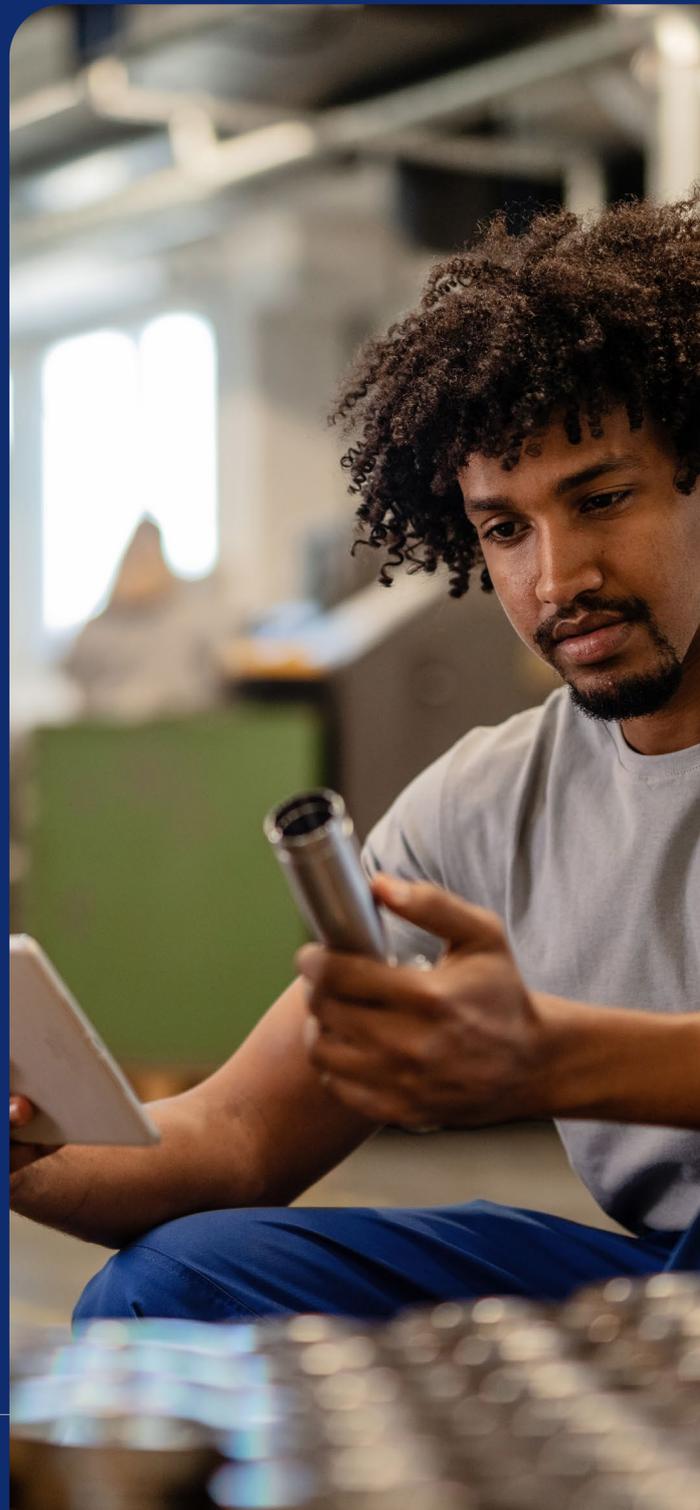

The platform enables employees in the field to capture what they're seeing and gives leadership reliable insight they can act on.

” Evotix has been a game changer for compliance, safety and maintenance, and for delivering better service to our customers.

Victor Cruz
DOT Compliance Officer,
W Silver Recycling

By bringing safety, compliance and equipment information into one place, Evotix supports clearer communication, more confident decision-making and stronger coordination across locations in the U.S. and Mexico.

To date, Evotix has helped W Silver:

Centralize safety, compliance and equipment reporting across U.S. and Mexico operations

Improve real-time visibility into hazards, incidents and equipment condition

Simplify audit preparation and OSHA reporting by site

Support preventive maintenance with clearer, photo-backed documentation

Looking Ahead

W Silver's focus remains ensuring employees go home safe every day. As the organization continues to grow, the team plans to use clearer data and shared visibility to identify trends, prevent repeat issues and support safer, more consistent operations.

Evotix supports this next phase by helping connect frontline insight with leadership decision-making, reinforcing a culture of accountability and continuous improvement across sites.
